Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 27 February 2007.

2a) This action is **FINAL**. 2b) This action is non-final.

3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Non-Final Rejection (8/13/07)

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 11-33 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 11, 25 recites "arranged and constructed". It is not clear what is the claimed limitation.

Claims 11, 25 recites "at least one guide element arranged and constructed to be supported on the convertible top compartment lid". It appears that guide element is not supported on the convertible top compartment lid. It is not clear what is the claimed limitation.

Claims 11, 25 recites "a linkage mechanism arranged and constructed to move the roof part between the closed position and the opened position". It appears from the figures that the linkage mechanism 35 is not even connected with the roof and therefore cannot move the roof.

Claims 11, 25, recites "at least one guide device arranged and constructed to contact the roof part during one segment of the movement path between the opened position and the closed position, wherein the guide device includes at least one guide element arranged and constructed to be supported on the convertible top compartment lid or the vehicle body, the at least one guide element being arranged and constructed to contact and then move along a guide path defined on the roof part when the roof part is moving from its closed position to its opened position and thereby effect a directional change of the movement path of the roof part when the guide device arrives in contact with the roof part". It appears that the guide device 33 does not contact the roof and therefore cannot guide the roof.

Above are just few examples of the discrepancies and therefore the Applicant is requested to go through the all the claims and ensure that the claimed matter has been described in the specification and shown in the drawings in such a way as to convey to one skilled in the art that the inventors, at the time the application was filed, had possession of the claimed invention. Correction is required.

Conclusion

1. The prior art made of record in attached Notice of Reference Cited (PTO-892) and not relied upon is considered pertinent to applicant's disclosure. This art of record shows various features similar to the applicant's invention.
